## Sauer Kraut Makes You Live Longer

SCIENTIST and layman alike have been  
apt to ascribe the longevity which is  
attained by the average German to the  
fact that beer is the staple beverage  
in the German household, and beer, be-  
cause of the malt which it contains, is a brain  
and muscle builder.

It may therefore be something of a shock  
to learn that the real life conservator of Ger-  
mans is not beer, but sauerkraut.

Americans formerly called sauerkraut "de-  
caying vegetables" and to a certain extent,  
this term, unflattering though it is, is not  
misapplied. But the very same thing that  
makes milk that has turned sour, or has  
"spoiled," healthy, makes sauerkraut healthy.  
Sauerkraut, like sour milk, contains cer-  
tain percentage of lactic acid, which destroys  
the old-age germ lodging in the digestive or-  
gans. It is a case of one bacteria destroying  
the other. It is, of course, of primary im-  
portance to keep the digestive organs healthy  
and sweet and pure.

We know what happens in a house in  
which the plumbing is in poor condition—  
everybody in the house is liable to contract  
typhoid or some other fever. The digestive  
organs perform the same functions in the  
human body as the plumbing does for the  
house, and they should be kept in first class  
condition all the time. If the digestive or-  
gans are in perfect condition there is little  
danger of any other disease whatever being  
contracted, because the body, if perfectly fed  
—and this means not too much nourishment  
just as well as not too little—simply casts off  
any disease germs that may come prowling  
about on the lookout for a nice, receptive  
place in which to breed mischief.

Not only serious diseases, such as typhoid  
and malarial fevers, are due to an inspired  
digestive activity, but colds, the most dis-  
agreeable of the minor ills that afflict the  
human body, are due to the same cause. A  
good many physicians nowadays, in treating  
a cold, merely treat the stomach, knowing  
that as soon as the stomach is in perfect work-  
ing condition the cold will take care of itself.  
The man or the woman who never over-  
eats, who keeps the digestive apparatus trim  
and fit, and occasionally eats or drinks food  
containing lactic acids, is securing the con-  
ditions that lead to old age.

Expert Workmanship  
Superior Materials

That's why you never see a twisted, unsightly  
awning with our name on it. Our awnings add to  
the appearance of any building and afford you the  
protection you need. We use John Boyle's awning  
stripe, exclusively, if there was any better we'd  
have it. And always remember that we deliver

J. L. GILLILAND, Mgr. 416 N. Oregon St.  
Both PhonesMORE HONORS FOR  
THE YANKEE BOYSIncrease Their Lead in the  
Final 400-Meter Race  
at Stockholm.

Stockholm, Sweden, July 12.—In the  
first and third places in the final of the  
400-meter race at today's Olympic  
games the United States team increased  
its big lead. The second place in this  
event, however, was captured by Hans  
Braun, the German runner, who was  
passed into the final by the disqualifi-  
cation of Donald R. Young, Boston A.  
A., yesterday after the American had  
breasted the race first.

The United States obtained another  
three points by carrying off the 3,000-  
meter team race in which Sweden was  
placed second and Great Britain third.  
Three More Points for Finland.  
The discus throwing (right and left  
hand) aggregated, was won by the re-  
cord holding Finn, A. R. Taipale, who  
thus brought three more points to Fin-  
land's total, which has surprised all  
here by its volume.

In the fencing the United States team  
was not able to reach the finals, in  
which the Belgians appear to hold a  
very favorable position, although Great  
Britain and Sweden are also rep-  
resented.

The decathlon, a very arduous task  
of all around athletic ability, finds sev-  
eral of the United States teams among  
the leaders as far as it has been con-  
tested. But the chances in this event  
are so precarious that no idea can now  
be obtained of the position the partici-  
pants are likely to hold at its conclu-  
sion.

U. S. Wins Five Points in Jump.  
Five points were scored for the United  
States in the standing high jump which  
was won by Platt Adams, New York A.  
C., an din which Benjamin W. Adams,  
New York A. C., was placed second.  
Greece also made a point in this event,  
C. Tschitiras being third.

Day's Summaries.  
400-meter flat race, final—Charles Reid-  
path, Syracuse university, first; Hans  
Braun, Germany, second; Edward P.  
Lindberg, Chicago A. A., third. Time,  
48 1-5 seconds.

Standing high jump, final—Platt Adams,  
New York A. C., first; Benjamin W.  
Adams, New York A. C., second; C.  
Tschitiras, Greece, third.

Discus throwing, right and left hand,  
final—A. R. Taipale, Finland, first,  
total thrown with both hands, 82 meters  
75 centimeters; E. Nicklander, Finland,  
second, total thrown, 77 meters 98  
centimeters; E. Mangrasson, Sweden,  
third, total throw, 77 meters 35 centi-  
meters; R. Neilson, Sweden, fourth, total  
throw, 71 meters 40 centimeters; James  
H. Duncan, New York, unattached, fifth,  
total throw, 71 meters 13 centimeters.

3,000-meter team race—United States,  
first; Sweden, second; England, third.

**VANIMAN BALLOON  
WAS DEFECTIVE**

Expert Says Gas Exhaust  
Was Located Over the  
Engine Exhaust.

Atlantic City, N. J., July 12.—The  
explosion of the gas envelope of Mel-  
vin Vaniman's airship here on July 11,  
which caused the death of its crew of  
five men, was due not to the action of  
the sun's rays as at first appeared, but  
to a fault in construction, which al-  
lowed the expanding gas to exhaust di-  
rectly over the exhaust of the propeller  
engines, thus igniting it. This is the  
conclusion reached by Charles Hillman,  
an expert, who has just concluded an  
investigation. Mr. Hillman made an  
examination of the balloon on June 15,  
and one of the first things that struck  
his notice was the arrangement of the  
six exhaust valves in the gas en-  
velope by means of which the gas,  
when it began to expand, was allowed  
to escape. This was Mr. Vaniman's in-  
vention to prevent accidents. These  
valves, according to Mr. Hillman, were  
placed three on each side of the en-  
velope in a horizontal line slightly on  
the lower side of the bag. Four of the  
valves, he said, were located directly  
over the exhaust of the propellers. Con-  
sequently when any one of the valves  
was opened, the rush of the gas would  
quickly come into contact with the ex-  
haust and the hydrogen would ignite it.  
This theory, Mr. Hillman thinks, is  
borne out by the fact that one of the  
exhaust valves, which has been found,  
was smoked showing signs of the ex-  
plosion.

STAMPEDE KILLS ONE  
AND INJURES FOUR

Memphis, Tenn., July 12.—When a  
fuse exploded on a crowded street car  
here today the frightened passengers  
made a rush for exit gates and in the  
scramble a negro woman was killed, four  
white women were seriously hurt and  
several other persons were seriously  
burned.

BANK MERGER MAKES STRONGEST  
INSTITUTION IN SOUTHWEST

Kansas City, July 12.—A merger of  
the National Bank of Commerce and  
the Southwest National Bank, both of  
this city, into one banking institution  
which it is said will be the largest in  
the southwest will be consummated in  
the next two weeks, according to the  
statement of J. J. Helm, vice president  
of the National Bank of Commerce to-  
day.

The new bank will be the Southwest  
National Bank of Commerce, capital  
stock \$3,000,000.

## WINNING WANTS

The Explicit Want Ads are the  
ones that bring the most replies—  
they are the ones that are read  
with the greatest degree of satis-  
faction.

When you write a Want, tell  
all the important facts. If you are  
advertising for help, tell just what  
is to be expected of the applicants.  
As a matter of fairness, those who  
seek employment should know all  
the principal facts regarding a po-  
sition, so that only those who are  
capable of filling such a place will  
be expected to apply.

In locating a position through  
the Want Columns, state your  
qualifications plainly and concisely,  
tell of your experience and enu-  
merate enough of the facts, so  
that those who are seeking work-  
ers will have full enough informa-  
tion, if they are interested, to  
communicate with you.

The explicit Wants tell clearly,  
concisely, in a minimum number  
of words, just the thought that  
is to be expressed.

## PEACHES

Peaches will be cheaper this year than for many  
years, and as usual our store will be

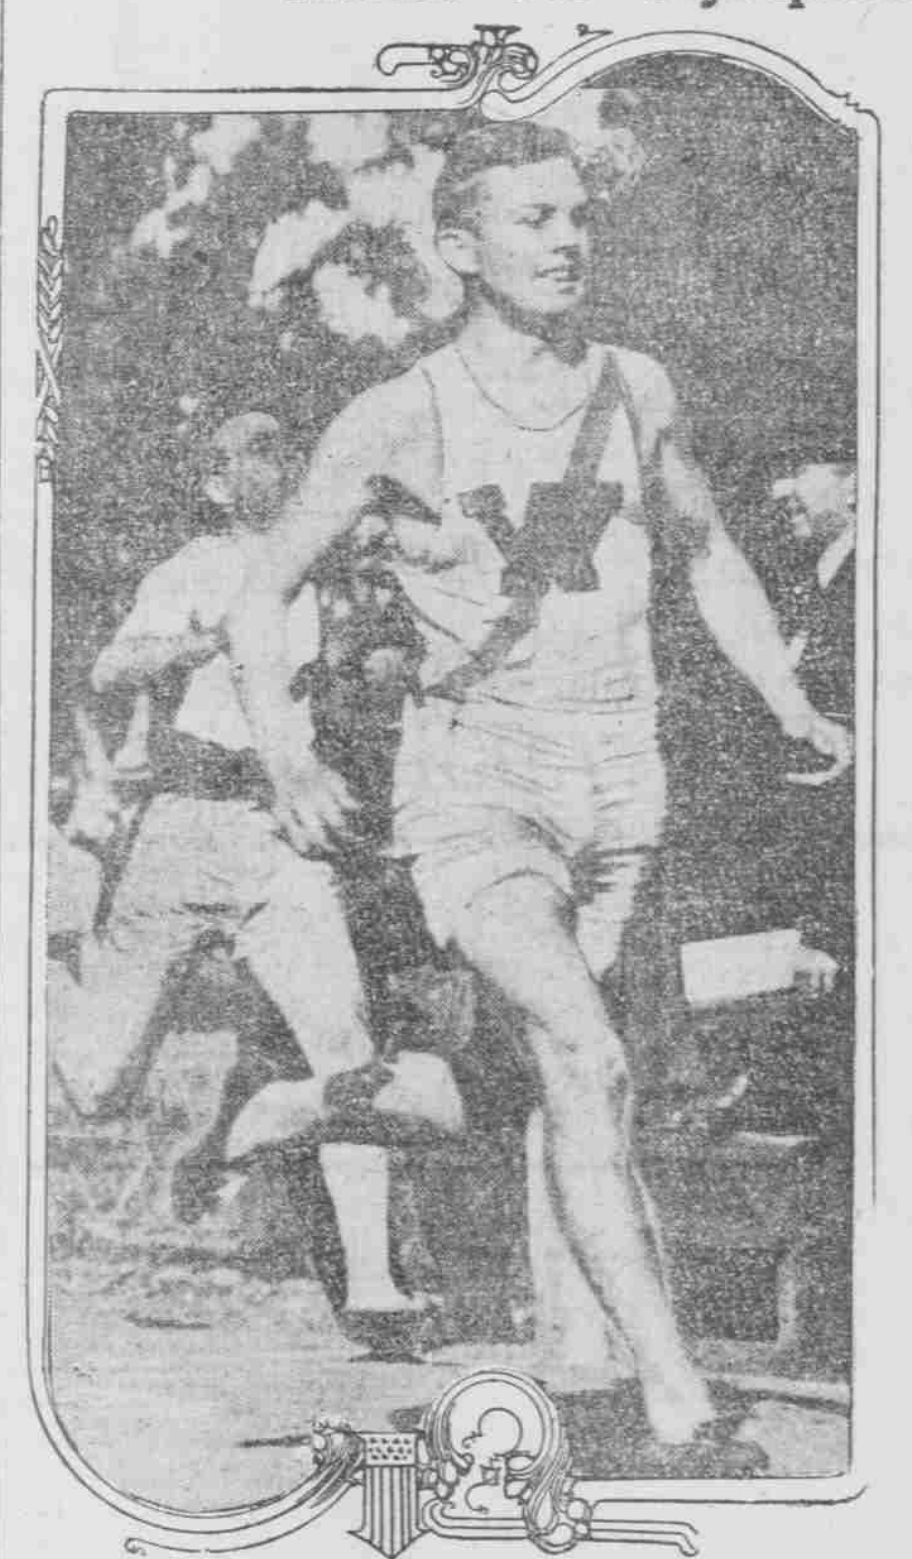

## HEADQUARTERS

and will carry the largest stock of all varieties to  
be found in El Paso. Be sure and look us over  
before you lay in your supply, as we will save  
you money, and at the same time give you  
the best qualities obtainable.

Westerner Wins High  
Honor At Olympiad

J. Ira Soutney, of Seattle, who was the first American to win a heat in  
the Olympic games at Stockholm, Sweden, winning his trial heat in the 100  
meters event.

NEW MINERAL LAW  
FOR THE STATESenator Hudspeth Will Try  
to Have Legislature  
Pass One.

State senator Claude B. Hudspeth is  
determined to give the mining pros-  
pector of Texas a chance to develop the  
mineral resources of the state and par-  
ticularly of western Texas.  
Senator Hudspeth announced Satur-  
day that he may introduce a bill at  
the next session of the legislature giv-

ing the much needed relief to the min-  
eral prospector.

"I am waiting for a decision of the  
state supreme court upon a test suit,  
Cox vs. Robinson, in which the state  
land commissioner by mandamus is to  
be compelled to issue a patent to the  
purchaser of school land which includes  
the mineral rights of the land which is  
purchased. The supreme court ad-  
judged without rendering a decision in  
this case. If it decides that the state,  
through the land commissioner, has no  
right to reserve the mineral rights of  
the school land when it is sold to a per-  
son, then our fight is won and there  
will be no need of a new law. But if it  
decides against us in this test suit and

## One Week Specials

Our weekly specials are the best news in the paper,  
if you've an eye to economy. Watch for them, we  
can save you many dollars. We don't advertise  
furniture at "half price," we don't mark our goods  
at such exorbitant prices, but we can save you at  
least 20 per cent or 25 per cent on any purchase  
you make.

\$12.50 Princess  
Dressers

Made of beautifully figured  
American quarter sawed oak,  
large beveled French plate glass  
mirror, special for one week

\$8.95

A large size dresser of American  
quartered oak, large French plate  
glass mirror, three large roomy  
drawers, worth \$15, our regular  
\$12.50 dresser, special one week  
only

we've got in Filing Devices.

## Curran's Book Store

108 MESA AVENUE.

holds that the state has this right, I in-  
tend to introduce a mineral law along  
the lines of the one which I introduced  
at the last session.

"This law will permit the prospector  
to go on the school land, prospect for  
ore or oil for one year without paying  
anything. If he finds mineral or oil, I  
intend, in my bill, to make it possible  
for him to pay for the land in the form  
of royalties, the exact amount of which  
is to be fixed according to the kind of  
mineral or oil found."

FARMERS MEET AT  
CANUTILLO SUNDAYWill Urge Improvement of  
Roads on West Side  
of River.

Canutillo, Tex., July 12.—A call has  
been issued for a mass meeting of the  
farmers in this vicinity on Sunday at  
3 o'clock in the new school building, one  
and a half miles west of Canutillo to  
discuss road roads. The roads west of  
the river are in miserable shape and  
efforts will be made through organiza-  
tion to put them in good condition.  
Rev. Henry Easter, of El Paso, will  
hold services in the school house Sun-  
day at 6 p. m. The new piano bought

by the church will be used at this ser-  
vice for the first time.

S. Terrazas' new store building is  
nearing completion.

Victor Val Verde, one of Orozco's men,  
after an absence of five months has re-  
turned to his ranch. Being an officer, he  
came back in an automobile.

United States reclamation service sur-  
veyors are again at work on the high  
line ditch survey. A detailed survey is  
being made to ascertain the acreage  
that would come under this ditch.

The Mountain State Telephone com-  
pany is moving its line from the mesa  
to along the Santa Fe right of way. The  
new location will make it easier for the  
repair men.

FORMER JUAREZ MAYOR IS  
HERE EN ROUTE WESTWARD

Francisco Portillo, jefe politico of  
Ciudad Juarez until the Madero revolu-  
tion, is in El Paso on his way from  
Mexico city to lower California. Mr.  
Portillo, as a special representative of  
the federal government, goes to make  
a report on conditions in northwestern  
Mexico along the coast and near the  
border.

After leaving Juarez, Mr. Portillo was  
appointed "perfecto politico," or mayor,  
of San Angel, a town in the federal dis-  
trict near the national capital, where  
he has since served. His present com-  
mission allows him to retain his office.

## How Adam and Eve GOT THEIR NAMES

Does a "rose by any other name smell  
as sweet?" Or, if it does, have not  
men and women been trying from the  
earliest times to fit thing and persons with  
appropriate names?

When it came to naming themselves they  
found many difficulties, and only within the  
last few centuries were real surnames  
adopted. Names were given either arbi-  
trarily or from personal characteristics or  
pursuits. Yet each name had some signifi-  
cance originally whether it applied to the  
person bearing the name or not.

In the Bible, for instance, names are very  
significant, being often explained in the text.  
When Adam gives a name to his wife, it is  
stated: "And Adam called his wife's name  
Eve; because she was the mother of all liv-  
ing." Eve therefore means "Life-bringer"  
and was an appropriate name for the first  
woman. The name Adam has been a great  
puzzle to students of names and of the Bible.  
It evidently comes from a Hebrew word  
meaning red, and has been explained as in-  
dicating that Adam was formed of red clay.  
All of the names in the Bible have been  
explained by etymologists, but many of them  
are explained in the Bible itself when the

name is given. Moses, for instance, is ex-  
plained as coming from a word meaning "to  
draw out," having been given to the little  
Hebrew infant by the Egyptian princess  
when she "drew him out of the water."

The name Jesus is the Greek form of the  
Hebrew name Joshua or Jeshua, and means  
"Jehovah is salvation," or God will save. The  
first Jesus known is the immediate suc-  
cessor of Moses, who led the Israelites into the  
Promised Land.

The name Mary is variously explained by  
scholars. It is Hebrew in origin, and by  
some is translated "Lofty, Exalted," while  
others claim that it is derived from the  
word meaning "Bitter," hence "Tears."

In modern times men were known by first  
names only until very lately, some distinc-  
tion being made by the addition of the  
father's name, such as John, son of William,  
or Williamson. So late as 1465, in the reign  
of King Edward the Fourth, it was enacted  
by Parliament that every Irishman dwelling  
within the English pale should take an En-  
glish surname. Descriptive names were com-  
mon in England, where men were known as  
Spindleshanks, Cockeye, Pigtail, Thick-lips,  
Pierce-eye.

The surname added to the proper name is  
so called because originally it was written  
over the other name, the prefix "sure" mean-  
ing "over" in French.

In some cases the surname was derived  
from the pursuit followed, as is the case with  
Smith, derived from the Anglo-Saxon Smitan,  
to smite. John is a Greek form of the He-  
brew Johanan, meaning "Gift of God," which  
idea when translated into Greek gives us  
Theodore—so John and Theodore mean the  
same.

Jones is the same as John or Johns, and  
Robinson is, of course, the son of Robin,  
which is identified with Robert. Robert is  
derived from two saxon words, Rode coun-  
sel and beorht, bright, meaning bright or  
famous in counsel.

No one would think that Jane is only the  
feminine for John, but that this is true is  
plain from the ancient form of the name,  
Joanne.

Diminutive forms—ette and kin—give us  
such names as Willett, Wilkins, meaning lit-  
tle will.

The name William is derived from the  
German Willhelm, meaning the shield (helm)  
or defense of many; will signifies much or  
many.
